ROFAKO
ENERGY SERVICES LIMITED

Rofako Energy Services Limited delivers safe, reliable scaffolding, access, & technical solutions for diverse industries.

Advanced **Scaffolding Solutions**

rofakoenergy.com

About Us

Rofako Energy Services Limited is a technical scaffolding and industrial support company providing professionally engineered access solutions for demanding project environments across Nigeria. We support clients in the oil & gas, construction, marine, yard, and industrial sectors with dependable scaffolding systems, technical expertise, qualified manpower, equipment supply, and project logistics.

Our capabilities cover the complete scaffolding lifecycle from technical design and procurement to sales, rental, installation, inspection, modification, dismantling, material recovery, and logistics support. By combining certified equipment with competent personnel and structured project execution, we help clients establish safe and efficient work-at-height environments while supporting productivity and operational continuity.

At Rofako Energy Services, our approach is built around three fundamentals: safe access, technical reliability, and quality execution. We work to understand each project's access requirements and provide fit-for-purpose solutions that meet operational demands, applicable standards, and site-specific conditions.

Our Mission

To provide safe, innovative, and reliable scaffolding and industrial support services that enable our clients to execute projects efficiently while maintaining the highest standards of quality, safety, and professionalism.

Our **Vision**

To be the preferred scaffolding and industrial support services company in Nigeria and across Africa, recognized for excellence, integrity, innovation, and customer satisfaction.

- **Professionalism:** We maintain the highest standards in every project we undertake.
- **Innovation:** We embrace modern solutions and continuous improvement.
- **Customer Focus:** We build lasting relationships by understanding and exceeding our clients' needs.

Services

- Procurement
- Sales
- Hiring & Installation
- Scaffold Training & Manpower Supply
- Design & Consultancy
- Logistics Support

Our **Core Values**

- **Safety First:** We prioritize the health and safety of our people, clients, and the communities we serve.
- **Integrity**: We conduct business with honesty, transparency, and accountability.
- **Quality:** We deliver products and services that consistently exceed expectations.

Procurement

We provide strategic procurement solutions for premium-quality scaffolding materials and accessories from trusted international manufacturers. We source durable, industry-compliant products that meet global safety standards, ensuring clients receive reliable equipment that enhances project efficiency, safety, and long-term value.

Our Procurement Capabilities

- Premium-quality scaffolding materials from verified global manufacturers
- Full compliance with international safety and quality standards (BRITISH STANDARD)
- Durable equipment designed for oil & gas, marine, and construction demands
- End-to-end supply chain transparency and competitive pricing

Sales

We supply a comprehensive range of high-quality scaffolding systems, components, and accessories for construction, industrial, oil & gas, and infrastructure projects. Whether for permanent ownership or project expansion, our products are competitively priced, quality-assured, and backed by expert technical support to help clients select the most suitable scaffolding solutions.

Our Sales Portfolio Includes:

1. Tubes & couplers scaffolds

2. Ringlock scaffold systems

3. Cuplock scaffolding systems

4. Quick stage scaffolding system

Hiring & Installation

Our scaffold rental and installation services provide safe, flexible, and cost-effective access solutions for projects of every scale. From project planning and material deployment to professional erection, inspection, modification, and dismantling, our experienced team delivers fully compliant scaffold systems designed to maximize productivity while maintaining the highest standards of workplace safety.

Our Capabilities

- Flexible short-term and long-term scaffold rental options
- Certified erection and dismantling by experienced scaffold crews
- Rigorous routine inspection, tagging, and safety certification
- Tailored access solutions for offshore platforms and high-rise structures

Scaffold Training & Manpower Supply

Rofako Energy Services provides practical scaffold training and competent manpower solutions to support safe, efficient, and professional scaffolding operations across onshore, offshore, construction, oil & gas, marine, and industrial environments. We offer basic level scaffold training, advanced level scaffold training and scaffold inspection training.Our training programmes focus on developing the practical knowledge and technical skills required for scaffold erection, modification, inspection, dismantling, and safe work-at-height practices.

Our Capabilities

Basic and Advanced level scaffold certification courses

Hands-on practical training combined with classroom safety theory

Supply of qualified, certified scaffold personnel for onshore & offshore sites

Certified instructors aligned with international safety frameworks

Design & Consultancy

We provide professional scaffolding design and technical consultancy services tailored to the unique requirements of each project. Our specialists develop safe, efficient, and cost-effective scaffold designs, conduct structural assessments, perform site evaluations, and offer expert guidance on compliance with industry regulations, helping clients mitigate risks and optimize project performance.

Our Capabilities

Custom 2D/3D scaffold design and structural load calculations

Comprehensive site surveys, risk assessments, and access planning

Why Choose Rofako Energy?

We bring industry leadership, certified safety practices, and end-to-end support to every project site.

Established industry expertise since 2018.

End-to-end scaffolding solutions—from procurement to installation.

High-quality scaffold materials for sale and rental.

Certified scaffold training and technical consultancy.

Reliable logistics support for seamless project execution.

Experienced professionals committed to safety and excellence.

Timely service delivery with competitive pricing.

Regulatory compliance audits and technical advisory services

Engineering optimization to reduce material usage and labor costs

Logistics Support

Our logistics support services ensure the seamless movement, delivery, storage, and retrieval of scaffolding materials across project locations. Through efficient planning, fleet coordination, and timely execution, we minimize downtime, improve operational efficiency, and ensure that equipment is available precisely when and where it is needed.

Our Capabilities

Nationwide transportation and site delivery fleet management

Secure material storage, inventory tracking, and yard management

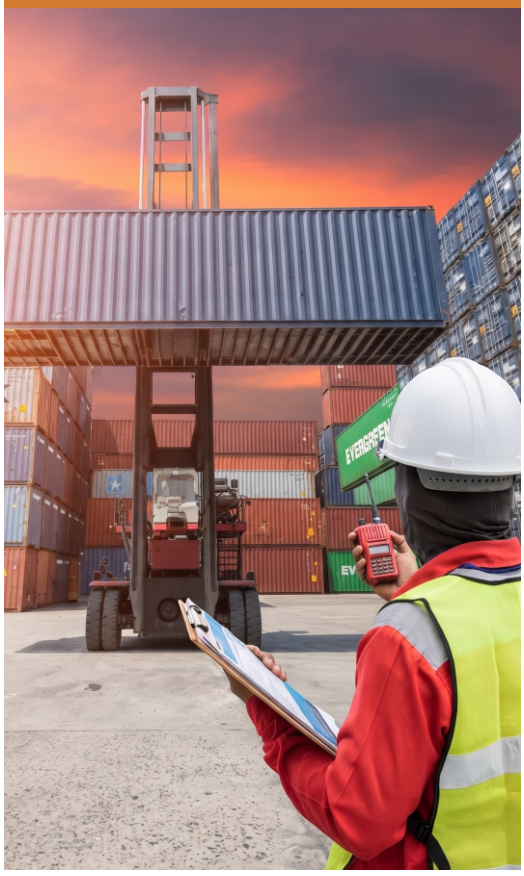

Rapid mobilization for emergency maintenance and shutdown projects

Systematic retrieval and material sorting upon project completion

Industries We Serve

- Oil & Gas
- Construction
- Marine & Yards
- Industrial Plants

“Engineered for Access. Built for Excellence.”

HSE — Health, Safety & Environmental Responsibility

At Rofako Energy Services Limited, Health, Safety, and Environment (HSE) excellence is the foundation of our operations. We are committed to maintaining a zero-harm workplace by implementing robust HSE management systems that protect our employees, clients, contractors, the public, and the environment throughout every stage of project execution.

Our operations are conducted in strict compliance with applicable national regulations, industry standards, and internationally recognized best practices. We integrate proactive risk assessment, hazard identification, safe work procedures, and continuous monitoring into every project to minimize operational risks and ensure safe working conditions.

Every member of our workforce undergoes regular HSE training and competency development to promote a strong safety culture and reinforce compliance with established safety protocols. We ensure that all scaffolding materials, installations, inspections, and dismantling activities are carried out by qualified personnel using approved equipment and procedures.

At Rofako Energy Services Limited, safety is not simply a regulatory requirement, it is a core value that drives our decision-making, operational excellence, and commitment to delivering reliable, incident-free solutions. Through continuous improvement, leadership commitment, and employee engagement, we are dedicated to achieving the highest standards of Health, Safety, and Environmental performance across every project we undertake.

Our HSE Commitment

+ Zero tolerance for unsafe acts and conditions.
+ Compliance with all applicable HSE laws, regulations, and industry standards.
+ Continuous risk assessment and hazard control.
+ Competency-based HSE training for all personnel.
+ Safe design, erection, inspection, use, and dismantling of scaffolding systems.
+ Protection of the environment through sustainable work practices. Continuous improvement of our HSE management systems and safety performance.
+ Promotion of a strong safety culture where every employee is responsible for health, safety, and environmental protection.
